

Sources of UV light

Learning Intention:

To sort these sources of light into the correct category and identify if ultra-violet light is present.

Success Criteria:

I can cut and stick
I determine whether light is natural or artificial
I can sort pictures under the correct heading
I can locate real-life examples and use a UV reactive device to record if UV is present

Natural light	Artificial light	UV present (yes/no)

Suggested light sources: LIGHT BULB, TORCH, SUN, CLOSED & OPEN WINDOW
